

## **The apprentice Donald Trump fails as USA President.**

The way he treated President Zelenskyj in the oval room in The White House is not a president worthy.

USA and the people of USA is the looser here. This is the opposite of making America Great Again.

Trading imbalance can only be repaired inside USA. This has to be realized by the apprentice DT. The people of USA must be told. But most important people like Elon Musk must be told! The only way to stop import is to produce the products cheaper in the country. The only way to increase export is to produce cheaper than others. I don't have to tell you more. WTO regulates international trade. USA as well as other countries should apply and act according to WTO rules.

The president apprentice Donald Trump fails and should be replaced fast! Unless USA loses its position in the economic world. US Dollars will lose its position as world currency!
