

## **That Trump was elected president was a terrible accident for the United States!**

He is destroying relations with America's allies with the way he handles Ukraine, This also applies to the crisis in the Middle East, Palestine. He puts tariffs on goods bought from allies and the effect is the same. He invites talks with Russia, which the alliance considers a danger. And that without involving the alliance in the context.

It is not possible to make more serious mistakes. And, the one who suffers in the context is the United States.

The US will have to decide whether the alliance, NATO, will continue.

When it comes to putting Russia in its place, you don't attack your allies. It is a betrayal.

Trump is not making America Great Again, quite the opposite. Attacking the symptoms does not cure the disease!
